

	<p>Open Slide Wild River W=1400, W=1600</p>	Width	1400, 1600	[mm]
		Pump Efficiency	240+160 ⁽¹⁾	[m ³ /h]
		Optimal Length	60-85	[m]
		Average Slope	5-13	[%]

⁽¹⁾In case of an extended river with ramifications it is essential to apply additional pumps, approximately 160 m³/h on the arm.

Wild River is a slide designed mainly for the outdoor use. Due to its size, its width in particular, the slide enables sliding of several people at the same time. Thanks to a little degree of slope the speed of sliding is moderate and with an open slide it gives us a chance to admire the surroundings. The Wild River makes the slide relaxing and calm during the free rafting in a pontoon. Undoubtedly, it is a slide that shall meet the user's expectations at any age.
