

|   |  |                 |                  |                     |
|---|--|-----------------|------------------|---------------------|
|  | <p>Family Slide<br/>W=2200, W=3000, W=4000</p> | Width           | 2200, 3000, 4000 | [mm]                |
|   |  | Pump Efficiency | 90               | [m <sup>3</sup> /h] |
|   |  | Optimal Length  | 10-25            | [m]                 |
|   |  | Average Slope   | 15-25            | [%]                 |

Its construction is designed for individual and group slides which will undoubtedly make every object, equipped with it, more attractive and also making it more friendly to families with children. Wide track for sliding and small slope of the slide allow to enjoy sliding with all safety measures taken. Its versatile character allows it to be installed indoors as well as outdoors which means it can be used for a whole year. It does not require to install a special landing zone, which allows to install it in the existing objects making it even more attractive for the users.
