

	Open Slide PENDULUM W=20m, L=16,5m, H=9,5m	Dimensions	W=20m L=16,5m H=9,5m	[m]
		Pump Efficiency	240+60	[m³/h]

The Pendulum is another slide of relatively atypical construction and therefore, it makes more attractive the facility it is going to be installed in. The name itself suggests what can be expected when using this type of slide. The user goes inside the construction with steep slopes and high walls, where, on the pontoon, he is sliding on both walls interchangeably. The slide is a great attraction for those liking extreme experiences.
