

CO NE

Cone waterslide brings unique possibilities by binding tubular riding experience with drop into the cone where the user is taken by forces up and down on the cones' wall, what give a real thrill. After some doze of adrenaline user is taken back into the tube slide to finally end up in the landing unit or pool.

Pol-Glass can design the waterslide with one or more Cones depending on Clients' wish.

Cone slide can be used as a body slide, but also as rafting slide for single and double rafts.

Starting height:
minimum from 3,5m

Hourly Capacity:
approx. 120 -360
(depending on the tubes selection)

Use:
as body slide or rafting slide

Speed:
< 25 km/h
